

Oleksandr Mykhalskyi

Senior Software Engineer • Backend, Cloud & Full-Stack

Hamburg, Germany · +49 175 893 5082 · michalsky.alex@gmail.com · github.com/micha-sky · alexmichalsky.com

PROFILE

Software engineer with 10+ years of production experience in Java and Python — microservices, cloud infrastructure (AWS, GCP, Kubernetes) and consumer-facing web applications. Track record of modernizing legacy systems with measurable results, including a PHP-to-Java migration that cut API response times by 60%. Recently added production LLM work to the toolkit (RAG pipelines and AI agents at taliox). Comfortable owning a project end to end, from requirements calls with the client to deployment and monitoring.

TECHNICAL SKILLS

Languages	Java (expert), Python (expert), JavaScript/TypeScript, PHP, Ruby
Backend	Spring Boot, Django, Flask, Laravel, Dropwizard, REST APIs, microservices, Kafka
Cloud & DevOps	AWS (Elastic Beanstalk, CloudWatch), GCP, Docker, Kubernetes, Jenkins, GitLab CI/CD
Data	PostgreSQL, MySQL, MongoDB, Redis, Apache Spark
Frontend	React, Angular, Gatsby, Tailwind, Bootstrap, Three.js
AI & LLM	LangChain, RAG pipelines (pgvector), MCP servers, LLM evals, Claude & OpenAI APIs
Enterprise	MS Dynamics Sales, Power Apps, Power Automate, Dataverse
Tools	Git, Maven, Gradle, Swagger/OpenAPI, Liquibase, Hibernate, JMeter, Cursor, Claude Code

EXPERIENCE

Full-Stack Developer — taliox GmbH, Hamburg

Oct 2024 – present

- Core developer on the **HubClub community platform** serving digital hubs across Germany (Django): built features for services, products and co-working processes in an agile team, with periods of project lead.
- Led the customization of Microsoft Dynamics Sales for a publishing client and built a sync module from their industry-specific ERP system (Power Apps, Dataverse, Power Automate), including direct client responsibility and regular alignment calls.
- Built an AI assistant inside the co-working platform: integrated several data sources, added actions such as room bookings, developed the chatbot UI, and implemented an MCP server with OAuth so external tools can access the same data securely (Python, Django, FastMCP).
- Developed a customer-support AI agent for a manufacturing client, including a RAG pipeline over structured and unstructured data (Postgres + pgvector) and an evaluation setup based on real user chats.
- Rolled out AI-assisted development workflows (Claude, Cursor) across the engineering team.

Tech: Python, Django, Laravel, MySQL, PostgreSQL, Docker, LangChain, FastMCP, MS Dynamics, Power Platform

Senior Java Developer — SpearAd GmbH (Nexxen Group), Hamburg

Dec 2022 – Feb 2024

- Migrated a legacy PHP API to Java microservices for an ad-tech platform — **cut API response times by 60%** with a zero-downtime transition.
- Designed the persistence layer with a custom query framework for complex, high-volume ad-serving queries.
- Owned the testing and QA strategy for the migration.

Tech: Spring Boot, AWS, Kubernetes, MySQL, Redis, Docker, Swagger, Liquibase

Senior Java Developer — Netfonds Gruppe, Hamburg

Apr 2021 – Dec 2022

- Developed Java microservices for a B2B financial services platform in a cross-functional Scrum team.
- Mentored three junior developers; established code review practices and technical onboarding.
- Managed CI/CD pipelines and GCP infrastructure with Kubernetes.

Tech: Java, Dropwizard, Kafka, GCP, Docker, Kubernetes, MySQL, MongoDB, Jenkins

Full-Stack Java Developer — ParcelLock GmbH, Hamburg

Oct 2017 – Mar 2021

- Built the nationwide **Paketstation Finder**, a consumer-facing parcel locker locator used across Germany, and owned the core API from design to release.
- Integrated PayPal payments, designed a new B2B partner interface, and ran security penetration testing.
- Built automated reporting tools (AWS, Groovy) and led infrastructure upgrades.

Tech: Java EE, JHipster (Spring Boot + Angular), AWS Elastic Beanstalk, PostgreSQL, Jenkins

FREELANCE & EARLIER EXPERIENCE

Python Developer (remote) — Dutch Analytics, Netherlands

Nov 2016 – Jun 2017

- Architected a scalable data pipeline and ML framework for predictive maintenance (Python, Spark, Flask, MongoDB, AWS).

Java Developer (remote) — Karlsruhe Institute of Technology (KIT)

2016 – 2018

- Contributed to JRODOS, a decision support system for nuclear emergency management; built data analysis and comparison tools (Java EE, Spring, PostgreSQL, Hibernate).

Co-Founder / DevOps Engineer — Apitect (startup)

Nov 2015 – Jun 2016

- Co-founded a real-time delivery tracking startup; ran AWS infrastructure, CI, and server monitoring.

Junior Developer (remote) — ZoomAndGo Inc., Canada

Sep 2014 – Jun 2017

- Built features for a map-based hotel booking platform with Google Maps API integration (Ruby on Rails).

SELECTED PROJECTS

spotitube — Python tool matching Spotify playlists to YouTube (2023)

sannaleone.com — artist website with custom design (Gatsby, 2025)

unwohl.com — musician site with Songkick integration (Gatsby, Netlify, 2024)

alexmichalsky.com — personal site with CSS transform experiments and 3D models (Three.js, 2022)

EDUCATION

M.Sc. Computer Science

Lviv Polytechnic University, 2009 – 2012

LANGUAGES

German — B1 certified, conversational B2+

English — fluent • Ukrainian — native
